### **Teaching Strategies Gold & The Creative Curriculum**

Teaching Strategies Gold is the learning management system that is being used in all our preschool classes. Teaching Strategies Gold is an observation based assessment system - the perfect companion resource for **The Creative Curriculum**. Based on the same 38 objectives that are predictors of school success, Teaching Strategies Gold is fully aligned with Creative Curriculum. It helps teachers know what to look for and how best to support children's continued progress. Teaching Strategies Gold provides linkage to the curriculum and points teachers towards activities and instruction connected to areas identified as in need of development based on ongoing assessment.
